

T841A,B Easy-To-See™ Heat Pump Thermostat

TRADELINE®

HOMEOWNER'S GUIDE

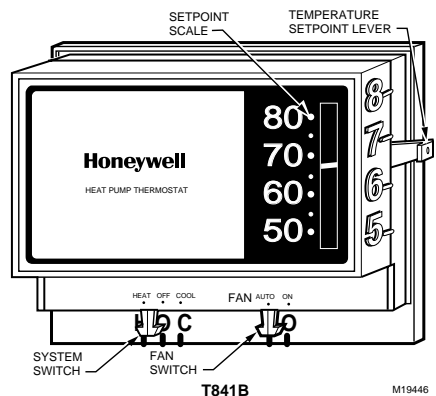

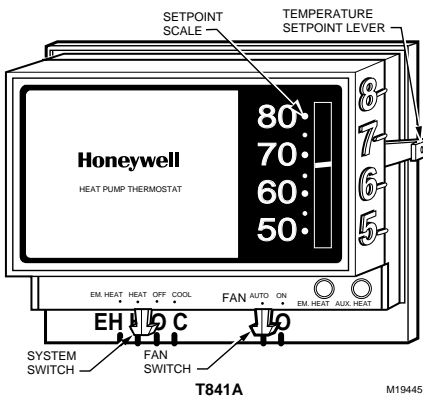

Features of Your New Thermostat

Enlarged, raised numbers make it easy for you to touch and see the temperature settings.

You can hear an audible click and feel an indent for every two degrees as you move the temperature setpoint lever.

The temperature setpoint lever lets you choose temperature settings from 46°F (8°C) to 84°F (29°C).

Enlarged, raised letters aid you when you are setting the System switch and Fan switch.

Temperature Selection

To select the temperature setpoint, slide the lever to the desired point on the setpoint scale. A click is heard and an indent felt every two degrees as the setpoint lever moves. The enlarged, raised 5, 6, 7 and 8 on the right edge of the thermostat provide recognition by touch and sight for the 50°F (10°C), 60°F (16°C), 70°F (21°C) and 80°F (27°C) setpoints.

System Switch and Fan Switch Settings

To select System switch and Fan settings, slide the levers at the bottom of the thermostat base to the desired setting. Enlarged, raised letters on the wallplate and the audible aid click heard at each indent in setting System switch and Fan switch settings.

T841A: The large EH, H, O and C are the EM, HT., HEAT, OFF and COOL System switch settings. The large A, O raised letters are the AUTO and ON Fan settings.

T841B: The large H, O and C are the HEAT, OFF and COOL System switch settings. The large A, O raised letters are the AUTO and ON Fan settings.
